Mobility
11-15 of May 2015

First day

First days of activities took place in Piero Calamandrei Technical Highschool, situated just three train stations away from the hotel. Students and professors involved in the project showed us the surroundings, including class rooms, school's canteen and the sport hall.

School's amphitheater

Afterwards, we went into the schools amphitheater, where every team from the participant countries had to present its members and also say a few things about their expectations about the project.

Romanian team

Turkish team

Bulgarian team

Slovenian team

Italian Team

Polish team

Second and third day

These were the days that all the teams had to present their plays, live and filmed. Most of us, for sure, were a little bit anxious, but everything went fine. We also went sightseeing on an open top bus.

Here are some pictures during the plays:

During each day,we also had some breaks where we could meet other people from the school or talk with the other participants over a cup of ice tea or a slice of pizza.

On the third day, after all the plays, all the students had to give feedback and also played a couple of games like writing on a flipchart paper a single word that would describe this project. We had a lot of fun doing that!

Fourth day

In our last day of activities, we went to the second school, Stendhall, a little bit further than the first one. Before the lunch break, we visited their school and courtyard and also managed to view a couple of videos made by the school's students.

After the lunch break, the school prepared us a workshop, where everyone had to create a mask, made out of cardboard, newspapers, water and glue. Some students would be ready to help us if we needed it.

Here are some photos during and after the workshop:

After we finished our workshop with the masks, it was the time for the ending ceremony where everyone got their diplomas for participating in this mobility and some surprise awards like the best actor/actress, best scenario etc. Beyond that, we had the chance to share our final thoughts about this whole awesome experience!
